

C-MATT™ COMFORT MATTRESS*

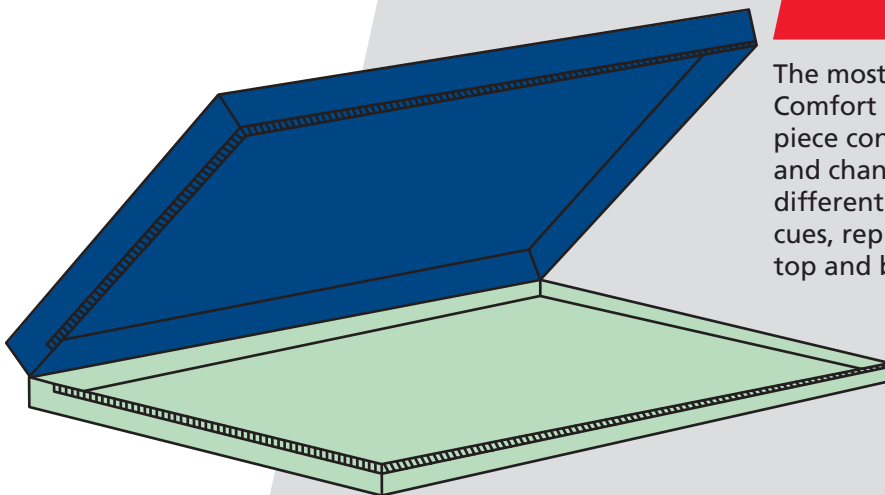

OEM Quality at Aftermarket Prices

The C-Matt Comfort Mattress is a versatile, multi-use mattress made especially for hospitals and clinics where patient comfort and easy cleaning are primary goals. The C-Matt Comfort is the result of over 20 years experience, consultation and product development in serving health care service providers around the world.

Attention to detail is evident, everywhere, in the design and construction of the C-Matt Comfort – from the easy to clean and disinfect Clamshell™ cover, to the five-zone, foam mattress topper that provides the ultimate in patient support and comfort.

The Casco Clamshell™ Cover

The most visible distinguishing feature of Casco's C-Matt Comfort Mattress is its distinctive blue and green, one-piece construction Clamshell cover, that makes cleaning and changeovers simple and efficient. What's more, the different colors are more than cosmetic. They are visual cues, representing different functions provided by the top and bottom halves of the mattress cover.

The C-Matt Comfort Top Cover:

- Is constructed of billowy, shear resistant, nylon fabric – the most popular hospital mattress fabric in the U.S.
- Is fluid, abrasion resistant and non-allergenic.
- Has anti-microbial properties that combat mildew and fungus.
- Exhibits a high MVP transmission rate – 400mg/m² per 24 hours.
- Has a built-in waterfall flap covering that prevents fluid intrusion into the mattress' foam core.
- Is fully wipeable, for disinfecting after each change of patient.

The C-Matt Comfort Bottom Cover:

- Is made of durable, tri-laminate Herculux II® vinyl fabric.
- Is fluid, abrasion resistant and non-allergenic.
- Has anti-microbial protection that prevents growth of mildew and fungus.
- Uses a special vented coverlet assembly that prevents moisture build-up.
- Casco uses the latest sealed seam Radio Frequency (RF) technology to make all bottom-cover seams completely fluid proof.

Foam Core

The C-Matt Comfort provides the ultimate in patient comfort for general use throughout typical healthcare facilities. Casco mattress construction features:

- Five zone, convoluted, 2-inch-thick, resilient Richfoam® topper from Carpenter.
- Four-inch-thick resilient base foam.
- Firm perimeter edges.
- All high density 100% virgin polyurethane foam in standard sizes.

C-Matt Comfort Mattresses are in Full Compliance with Flammability Standards

- Meets California Technical Bulletin 117.
- Optional flame barrier meets California Technical Bulletin 129.

Standard Sizes

- 80" x 35½" x 6"
