

C-MATT™ SEALED MATTRESS

OEM Quality at Aftermarket Prices

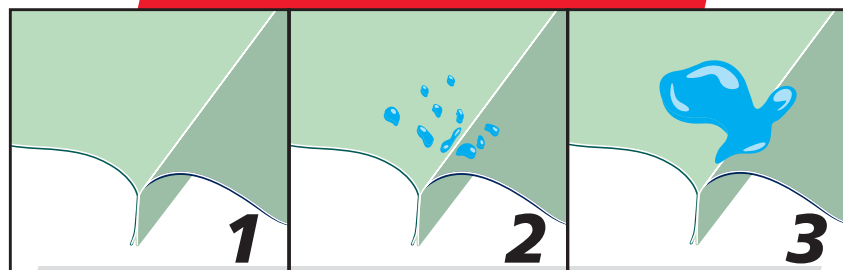

The C-Matt Sealed Mattress is designed to provide comfort, support and total protection against contamination from external moisture and bodily fluids. All surfaces are wipeable and must be disinfected after each change of patient. The C-Matt Sealed Mattress is an economy-priced surface for hospitals, clinics and institutional use.

Casco uses Radio Frequency (RF) technologies to seal all mattress seams, creating secure joints that defy the intrusion of moisture. That means the integrity of a C-Matt Sealed Mattress' foam core remains uncompromised throughout its long, productive life. It means odors can be wiped away in seconds, using standard disinfectants. It means stains and soiled mattress covers are a thing of the past. It means real savings in maintenance and replacement costs..

Casco. Providing innovative solutions for healthcare professionals for over 20 years.

Advantages of Sealed Seams

- 1** RF welding creates a contiguous bond, stronger than a sewn seam, yet without the needle holes that allow fluids to penetrate to the core of ordinary mattresses.
- 2** Casco sealed seams extend product life by shielding the foam core from moisture and unpleasant odors.
- 3** The C-Matt Sealed mattress eliminates the prime breeding grounds for bacteria and unpleasant odors.

Strong Support for Institutional Needs

The C-Matt Sealed is an economical replacement mattress, ideal for both institutional and medical use where short patient stays and frequent patient changes are the norm.

- All seams are Radio Frequency sealed.
- The elimination of threads, punctures and zippers blocks fluid from wicking inside to the foam core.
- Odors are reduced and all surfaces can be cleaned and disinfected in seconds.

Versatile. Durable. Economical.

C-Matt Sealed Mattresses from Casco are designed for heavy use and long life.

- Mattresses can be flipped or rotated for even wear.
- Accommodates patients up to 300 pounds.
- Sized in 80" and 84" lengths

Made to Last

RF sealed mattresses from Casco are constructed of materials equal to or better than OEM quality. C-Matt Sealed Mattresses feature:

- Durable, tri-laminate Herculux II® vinyl covers.
- Anti-Microbial protection that prevents growth of mildew and fungus.
- A vented coverlet that permits condensation to escape.
- Fully wipeable surfaces that can be disinfected after each change of patient.
- 100% virgin polyurethane Richfoam® from Carpenter with no fillers or additives.

Seam Strength of materials – seam strengths greater than 100 + lbs./in. can be achieved

Compliant with Flammability Standards

- Meets California Technical Bulletin 117 and 16 CFR Part 32.
- Optional flame barrier meets California Technical Bulletin 129.

Standard Sizes

- 80" x 35½" x 5"
- 84" x 35½" x 5"

Shipping

- Can be shipped individually, or in any required quantity.
- Ask about our quick-ship program to help meet your state survey goals.
